Profile

Experienced Tech professional in AI, Big Data, Software Development, DevOps, and Real-Time Monitoring Solutions. Skilled in building deep learning models, LLM, GenAI, Agentic RAG, Cloud tools, and Agentic systems, developing end-to-end data pipelines. Also experienced in containerized deployments, monitoring, and visualization tools, and mentoring team members. Passionate about bridging AI research and real-world applications, especially in global and culturally diverse teams.

Skills

- Machine Learning & AI:
 - Agentic RAG, LLM & GenAI integration.
 - Cloud-based inference, Cloud automation with LLMs (LangChain, FAISS, S3, AWS).
 - Deep learning, GAN, CNN, Transformers.
 - Computer Vision, Symbolic Regression.
- Big Data Pipelines and Workflow Orchestration:
 - Apache Spark, Apache Airflow, ETL Design.
 - HDFS, Distributed Processing.
- Database and Backend:
 - SQL: MySQL, PostgreSQL.
 - NoSQL: MongoDB.
 - API & middleware (FastAPI, Django REST).
- Web and Mobile Development:
 - Full-stack and multi-platform apps (Angular, Django REST).
 - CMS and full-stack solutions.
- Real Time Monitoring and Visualization:
 - End-to-end real-time monitoring & Alert Generation (Zabbix, Grafana).
 - High-availability and parallel-processing architecture.
- DevOps and Engineering Practices:
 - Git, Docker, Agile Methodologies.
 - Unix Administration, Shell Scripting.
- Soft Skills:
 - Fluent in English with collaboration experience with teams across Asia, Europe, and North America.
 - Skilled in mentoring peers and junior engineers, fostering cooperative teams.
 - Adaptable to multicultural environments with a focus on continuous learning and reliability.

Professional Experience

AI Solutions Associate – Reliance Legal Services Dhaka, Bangladesh (Oct 2025 – Present)

- Built an LLM-powered document generation system, reducing per-case formatting time from **30 minutes to under 1 minute**, directly optimizing performance across the practice.
- Designed and deployed an agentic RAG pipeline, enabling semantic search across historical briefs, contracts, and memos.

Specialist OSS Developer (Associate) – Banglalink Digital Communication Ltd Dhaka, Bangladesh (Jan 2023 – June 2024)

- Functionally led full-stack development, deployment, and management of monitoring & alerting tools with HA and parallel nodes (Zabbix, Grafana, MySQL, PostgreSQL).
- Automated maintenance & optimized resource utilization, **significantly reducing overhead (20+% in CPU, ~50% Storage, ~15% Alert Processing)**.
- Mentored 3 new hires and accelerated onboarding through hands-on project coaching.

Big Data Analyst (Contractual) – Banglalink Digital Communication Ltd, Dhaka, Bangladesh Dhaka, Bangladesh (Oct 2022 – Dec 2022)

- Designed and deployed data pipelines and orchestration engines to provide stakeholders with the necessary KPIs (Apache Spark, Airflow).
- Explored and tested distributed and parallel Big Data/ETL tools in a data-driven environment, and tested acquired knowledge with peers (HDFS, Spark, Airflow, MySQL, Java, Python).

Python DevOps Engineer – Shurjomukhi Solutions Ltd, Dhaka, Bangladesh Dhaka, Bangladesh (Jan 2022 – Sep 2022)

- Developed containerized Django REST WebApps with MySQL and Docker in Agile workflows.
- Mentored 2 junior developers and business staff, aiding in effective in-house tool adoption.
- Collaborated with the Machine Learning team to research and develop ML models for in-house applications.

Independent AI Projects (July 2024 – Present)

- Prototyped an Agentic RAG-based educational assistant to help improve teacher/student feedback and grades.
- Developed a transformer-based symbolic regression model (real + synthetic data), inspired by the AI-Feynman research.

Academic Research Project: Real-Time Sign Language Detection, AI Use Case and Analysis

- Designed Deep Learning models (CNN, RNN, ResNet), created a Bangla Sign Language dataset.
- Implemented live sign-to-text translation and got user feedback on the most convenient Sign Language.

Education

North South University, Dhaka, Bangladesh (Jan 2022)

- Bachelor's in Computer Science and Engineering
- Major in Machine Learning

Language

- English – Fluent
- Bengali – Native
